

The optimal solution for Aspiration of Seroma

Seroma-Set™ is a sterile single use closed system for draining of Seroma fluid after breast surgery.

Seroma-Set™

- Closed system – much safer
- Easy and faster aspiration
- Less risk of contamination
- User friendly – simple to use
- Operated easily with 1 hand
- Ergonomic handle
- Patient friendly
- Latex and DEHP free
- Cost effective

Seroma-Set™ can be used for all Seroma aspirations, typically after:

- Breast cancer surgery – after Mastectomies, breast re-construction
- Abdominal surgery – like “Tummy Tuck” (Abdominoplasty)
- Plastic surgery – e.g., after facial surgeries
- Hernia Surgery
- C-section and Hysterectomies
- Surgery around active joints
